Description:

Summary

Acetaminophen (Paracetamol) is also known as paracetamol or APAP. It is a medicine used as a pain killer or pain relief. It is also used in case of fever treatment. Acetaminophen has weak anti-inflammatory properties and is used as a common analgesic, but may cause liver, blood cell, and kidney damage. Acetaminophen consists of a benzene ring core, substituted by one hydroxyl group and the nitrogen atom of an amide group. Para-aminophenol (PAP) is a final intermediate in the industrial combination of acetaminophen and is used in the manufacturing of products having various applications in different areas such as pharmaceuticals, dye industries and chemical industries.

This report mainly covers the Acetaminophen product type, while we can also offer any product survey report related to the Acetaminophen industry chain.

Acetaminophen market research report provides the newest industry data and industry future trends, allowing you to identify the products and end users driving revenue growth and profitability.

The industry report lists the leading competitors and provides the insights strategic industry analysis of the key factors influencing the market.

The report includes the forecasts, analysis and discussion of important industry trends, market size, market share estimates and profiles of the leading industry players.
